TECHNICAL SKILLS

Languages: JavaScript, C++, HTML, CSS
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Context API, Responsive Design
Backend & DB: Node.js, Express.js, RESTful APIs, JWT, Middleware, MongoDB, Mongoose
Tools & Services: Git, GitHub, Postman, VS Code, Cloudinary, Gemini/LLM APIs
Core: DSA, OOP, Authentication, Authorization, API Design — **Solved:** 250+ LeetCode/GfG problems

PROJECTS

PrepPilot: AI Interview Preparation Platform Live | GitHub
React, Node.js, Express, MongoDB, Gemini API, Puppeteer

- Built a full-stack Generative AI app that analyzes a resume (PDF) against a job description and generates a match score, skill-gap analysis, tailored interview questions, and a preparation plan.
- Integrated the Gemini API with Zod schema validation for reliable structured JSON output, and used Puppeteer to generate ATS-friendly resume PDFs.
- Implemented JWT auth in httpOnly cookies, bcrypt hashing, token blacklisting on logout, and per-user authorization on every report endpoint.

LeetCode Clone: AI-Powered Coding Platform Live | GitHub
MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary, LLM API

- Developed a MERN coding practice platform with problem listings, difficulty/tag filters, detailed problem pages, and an in-browser code editor.
- Implemented JWT authentication and role-based authorization (user/admin) with protected routes on client and server; designed REST APIs and MongoDB schemas for users, problems, and submissions.
- Integrated Cloudinary for video upload, storage, and streaming of problem solution videos.
- Added an AI chatbot powered by an LLM that answers user queries and doubts on problems and concepts.
